**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 29-34 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 23-25, 28 and 31 of U.S. Patent No. 6,372,206 B1.

Although the conflicting claims are not identical, they are not patentably distinct from each other because although ‘206 does not mention the effect on blood lymphocytes, the steps and ingredients used in the method of ‘206 and that instantly claimed are indistinguishable.

Therefore, any affect on blood lymphocytes as a result of the method claimed in ‘206 is inherent since the population treated, the method of treatment and the ingredients used in the method are identical.

Claims 29-34 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3 and 11 of U.S. Patent No. 5,906,816. Although

Art Unit: 1648

the conflicting claims are not identical, they are not patentably distinct from each other because multiple sclerosis is an inflammatory condition, a pharmaceutically effective amount encompasses the dosages instantly claimed and the ovine interferon tau administered in the method of '816 would have at least the required 70% sequence homology with the instantly claimed ovine interferon tau.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The applied references have common inventors and assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Claims 29-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Soos et al. (US 6,372,206 B1 for reasons discussed above.

Claims 29-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Soos et al. (US 5,906,816) for reasons discussed above.
